New Post Office

Plans to acquire a new post office in Freeland, Michigan, were announced by Postmaster General John A. Gronouski.

"The new building," Mr. Gronouski said, "is designed to carry out the Post Office Department's objective of providing newly constructed postal units where they are most urgently needed in the interest of more efficient postal service and improved working conditions for postal employees."

"The emphasis in our lease construction program will continue to be on adequate space for postal operations, not only for current needs but for the foreseeable future."

"The construction program is being concentrated in those areas where the need is urgent and suitable space cannot be obtained except through new construction."

(next column)

The building in Freeland will be located on the south side of Washington between First and Second Streets. The Department holds an assignable option on this site. Preliminary plans call for 3,000 square feet of floor space, and the total land area will be 16416.75 square feet.

When completed it will serve 6,000 people in the area, and it will replace the present inadequate facility.

The Postmaster General said the building will be constructed under the Department's Lease Construction Program;

which utilizes the resources and investment funds of private enterprise for needed postal buildings.

The Department's capital investment, Mr. Gronouski said, will be limited to postal equipment. The building will remain under private ownership while leased to the Federal Government and the owner will pay local real estates taxes.

Plans and specifications for the new building, as well as bidding forms and other pertinent data, will be made available to prospective bidders at an early date, at which time the Post Office Department will advertise for bids. The site option will be transferred to the successful bidder, who will purchase the land, construct the building and lease it to the Department on a long term basis.
